

## How to customise the PrescQIPP IMPACT tool to review a specific patient's medication

1. Go to: [www.PrescQIPP.info](http://www.PrescQIPP.info) and log in.
2. Then go to: <https://www.prescqipp.info/our-resources/bulletins/bulletin-268-impact/>

Only if you are logged in, you will see the IMPACT “visual data pack”:

### Visual data pack

Introduction **IMPACT Bulletin** Background References

Use the filters below to customise your IMPACT report.

Region: (All) STP: (All) Commissioner: (All) Boundary: (All) PCN: (All) Practice: (All)

BNF Chapter: (All) Drugs: (All) Clinical Risk: (All) Priority: (All)

BNF class / Drugs	Considerations to optimise medicines use after checking for a valid current indication	Withdrawing/tapering advice	Clinical Risk	Deprescribing priority if no...	Links to support tools/deprescribing algorithms	Total Cost by BNF class / Drugs (Apr20-Mar21)
-------------------	--	-----------------------------	---------------	---------------------------------	---	---

If you are not logged in, you will only see the PDF downloads:

### Downloads

[268. IMPACT 2.0.pdf](#)

[268i. IMPACT 2.0.pdf](#)

[268i. IMPACT 2.0 Scotland.pdf](#)

[268i. IMPACT 2.0 Wales.pdf](#)

3. On the Visual data pack, click on the “IMPACT Bulletin” tab (highlighted above).
4. Use the “Drugs” filter to select only the drugs which your patient is taking. Deselect “All” then select the relevant drug classes, then “Apply”:

#### Use the filters below to customise your IMPACT report.

Region: NHS ENGLAND SOUTH WEST STP: BATH AND NORTH EAST SO... Commissioner: NHS BATH AND NORTH EAST... Boundary: NHS BATH AND NORTH EAST...

BNF Chapter: (All) **Drugs:** (All) Clinical Risk: (All)

<input type="checkbox"/>	(All)
<input checked="" type="checkbox"/>	ACE inhibitors
<input type="checkbox"/>	Aldosterone antagonists / Mineralocorticoid receptor antagonists
<input type="checkbox"/>	Allopurinol or febuxostat
<input checked="" type="checkbox"/>	Alpha 1 blockers
<input type="checkbox"/>	Analgesics – non opioid
<input checked="" type="checkbox"/>	Analgesics – opioid
<input type="checkbox"/>	Angiotensin II receptor blockers

- The table will then only display the relevant sections, arranged by BNF chapter. If you have a large number of drug classes and you want to prioritise potential interventions, you can filter by “Deprescribing Priority”:

**Priority:**

(All) ▼

(All)

High

Low

Medium

Cancel      Apply

- If you are interested, the Visual Data Pack can also tell you how much your PCN/Practice has spent on each drug class in the previous financial year:

Community Interest Company

**PCN:** [REDACTED] **Practice:** (All) ▼

**Priority:** (All) ▼

Clinical risk	Deprescribing priority 1 of no..	Links to support tools/ deprescribing algorithms	Total Cost by BNF class / Drugs (Apr20-Mar21)
			<b>£112,162</b>
