\* Although a TVN can prescribe any wound care product on formulary, the expectation is for other nursing teams to retain prescribing/ordering of most dressings. Therefore the TVN formulary includes TVN specialist items only.

Formeo is an online ordering platform for healthcare staff working in GP practices, nursing homes and BaNES community settings to order wound care products. Prescribing wound care products on FP10 prescription can be wasteful because the items dispensed can only be used for that one patient. Products ordered via Formeo may be obtained at a lower price than on FP10 and they become the property of the GP practice/nursing home/clinic, so a box of dressings can be used for multiple patients - reducing wastage.

BSW works within the BSW & BNSSG Wound Care Formulary Group to ensure the woundcare formulary includes a comprehensive list of clinically and cost-effective choices that have been approved for use by BSW specialist TVNs.

The formulary should cover the vast majority of prescribing. Occasions where woundcare products not on the formulary are required should be at the discretion of a senior nurse with clear reasons documented.
