

Deprescribing - Useful tools

Thank you for attending our education session on polypharmacy and deprescribing we hope you found this helpful.

We just wanted to make you all aware of some **useful tools** which might complement some of the topics covered in the webinar and support future work in this area.

Guidance document:

[Prescribing guidance for moderately to severely frail patients](#) is available on our website.

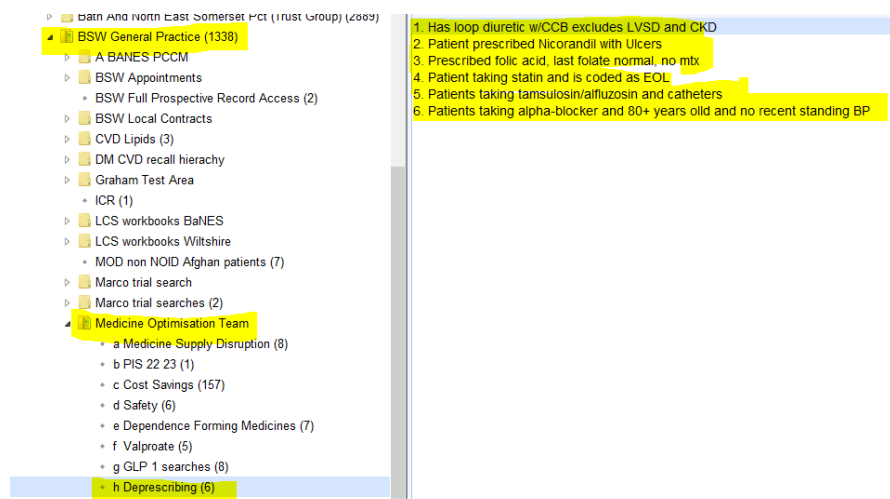

SystemOne tools:

BSW ICB deprescribing searches

We have created a number of reports which we hope will help identify particular patients who may benefit from a medication review with a view to deprescribe where appropriate.

- Searches can be found by going into **Reporting -> Clinical Reporting** from main screen.

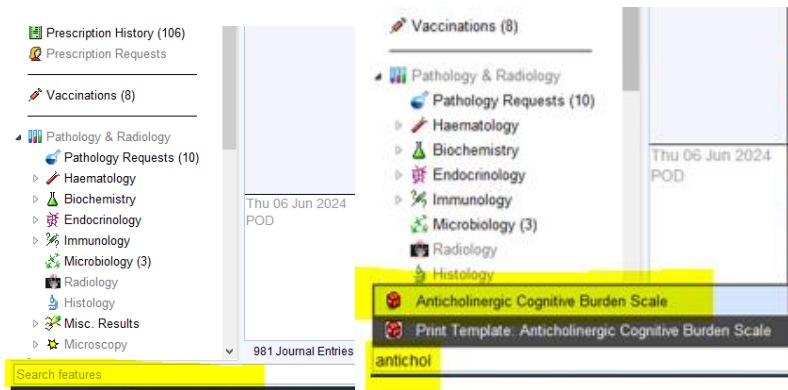

Folder location: **BSW General Practice -> Medicines Optimisation Team -> h Deprescribing**

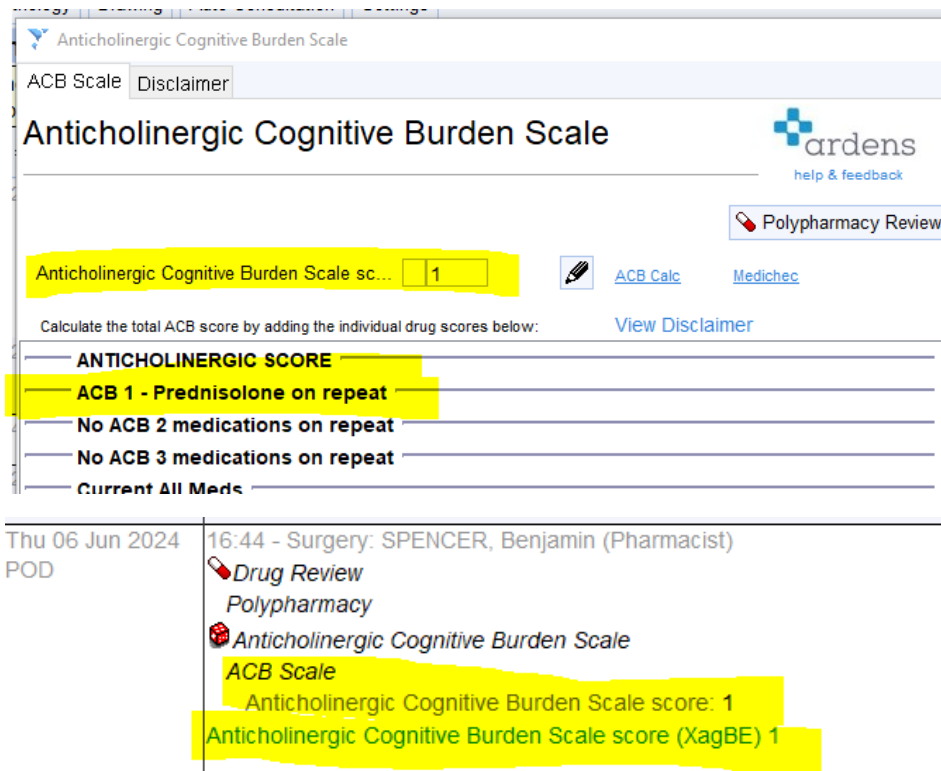

Our team will be periodically adding more searches. But please feel free to contact us on bswicb.prescribing@nhs.net if you have any ideas for searches which might be helpful. We can try our best to create these and share across BSW practices.

Ardens ACB scale calculator in SystemOne

Ardens have created a ACB scale calculator on one of their templates which can be found by searching for 'anticholinergic' in the bottom left 'search features' box whilst in a patients record.

It will then display whether there are any drugs with a ACB score and the relevant score under where it says, 'ANTICHOLINERGIC SCORE'. You can then add up the score and enter this into the respective 'anticholinergic cognitive burden scale score' box (highlighted) and click 'ok'. This will record the score in the patients notes.

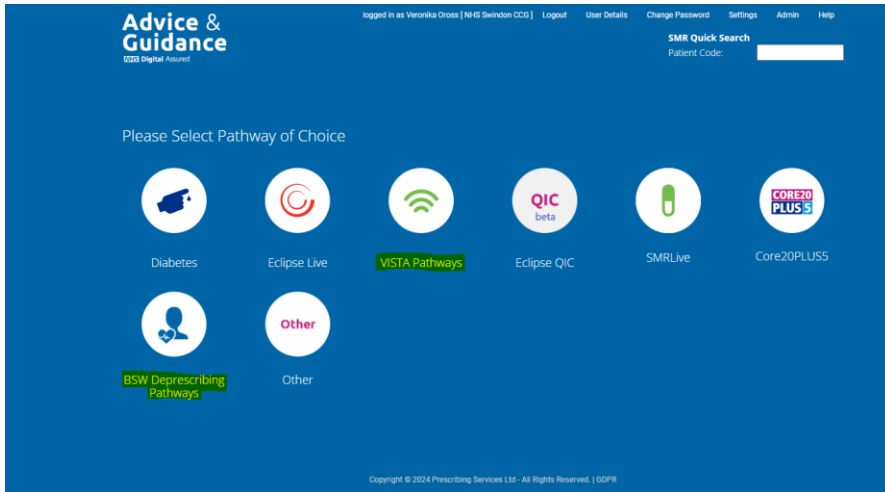

Leaflets about anticholinergic medication for patients (multilingual) available on our website [here](#).

Eclipse:

From the home screen you have two options:

- **BSW Deprescribing pathways**
- **Vista Pathways**

Vista Pathways – ICB Deprescribing (Age>65 with eFI>0.25) - click on: View.

Pathway: [ICB Deprescribing \(Age>65 with eFI>0.25\)](#) | [NHS Swindon CCG](#) | [All Practices](#)

Completed Tests Breakdown		Patients in Range Breakdown	
1800 Patient Count	0 / 0 Monitoring Tests	0 / 0 Outcomes	
19 / 76 Alerts	0.87 Admissions per patient A&E	0.69 Admissions per patient APC	

[Comparison Charts \[Jun 24\]](#) | [Alert Suite Request](#)

Safety Alerts

Patients

Priority Patients

Click on Priority Patients:

ICB Deprescribing (Age>65 with eFI>0.25)

Filters: *None* | [Core20PLUS5 Filter](#)

	Total Patients (ICB Deprescribing (Age>65 with eFI>0.25))	Total Patients in cohort	% Patients in cohort	
Patients on Benzodiazepine	1791	286	15.97%	View
Patients prescribed Opiate	1791	966	53.94%	View
Patient prescribed Gabapentin	1791	356	19.88%	View
Patient prescribed Pregabalin	1791	386	21.55%	View
Patients on Z-drugs	1791	196	10.94%	View
Patients prescribed Codeine	1791	284	15.86%	View
Patients with Systolic < 115mmHg and on Hypertensive Medication	1791	150	8.38%	View
Patients with HbA1c < 46 and on Sulphonylurea	1791	6	0.34%	View
Patients with HbA1c < 46 and on Insulin	1791	7	0.39%	View

Then click on View next to the search on the right to view the list of your patients.
