Keppra	Levetiracetam		Category 3 Antiepileptic

2024/25 Savings Recommendations
Prescribe Well – Spend Less

Lamictal tablets	Lamotrigine		
Lidocaine patches	If can't be stopped, prescribe Ralvo brand	Stop prescribing Low Value Medicine	
Liothyronine tablets 5 microgram, 10microgram,	Liothyronine Capsules 5 microgram, 10microgram,		
Melatonin (immediate release) 3mg capsules	Adaflex (immediate release) 3mg tablets		
Naproxen GR, effervescent, suspension	Naproxen standard	Avoid GR and liquid versions unless necessary	
Qvar 50 &100 (Note: NOT the Autohaler or Easi-breathe)	Kelhale 50 & 100 (Same device. Dose counter to help patient use the full inhaler and order timely)		
Relvar 92 & Incruse	Trelegy	Switch to single inhaler. Higher strength Relvar not on searches as indicated for asthma not COPD. Consider carefully whether patient truly needs triple therapy or LABA/LAMA	BSW COPD Guidance (Nov 2021)
Seretide 500/50 accuhaler	Relvar 92	COPD guidance only recommends low dose ICS. Seretide Accuhaler not on asthma guidance. For Asthmatic patients, consider this switch patient carefully and assess	
Seretide Evohaler, Fluticasone/salmeterol 250/25 or 125/25 MDI	AirFlusal (all fluticasone/salmeterol are non-formulary in asthma – do NOT start new patients). Luforbec: For COPD patients who need a pMDI	Prescribe by BRAND – avoid generic combination inhalers. Switch Seretide 250/25 or 125/25 to equivalent BRAND. Involve respiratory nurses in decision making/copy them in	BSW Asthma Inhaler Prescribing Guidelines in Adults
Sertraline 28 x 25mg tablets	Replace with Sertraline 14 x 50mg tablets	Replace sertraline 25mg tablets with 25mg dose achieved by taking half a 50mg tablet or a 50mg tablet taken on alternate days. Sertraline 25mg are not in the	

2024/25 Savings Recommendations
Prescribe Well – Spend Less

		Drug tariff and not included on BSW Formulary. The only indications for this strength is the initial 7 days dose titration in adults for panic disorder, post-traumatic stress disorder and social anxiety disorder and in children for obsessive compulsive disorder.	
Symbicort, DuoResp, Budesonide/formoterol 100/6, 200/6 or 400/12	Fobumix 80/4.5, 160/4.5 and 320/9 (Symbicort or DuoResp non-formulary)	Switch and prescribe by brand	
Tiotropium 18mcg or Spiriva DPI (not Respimat)	Braltus	Switch as per COPD guidance	
Unexpectedly expensive items	Run search to see if any of these items are being prescribed. For example: amitriptyline10mg/5ml, but 25mg/ 5ml and 50mg / 5ml are a lot more cost-effective		
Vitamin B compound (standard & strong)	Deprescribe	Change in guidance, Vit B compound no longer recommended for alcoholism. N.B. Please ensure there is an adequate thiamine daily dose of 200mg to 300mg	

Prescriber switches only

Cialis OD (2.5mg or 5mg)	Sildenafil or Tadalafil (once a week or on demand PRN)		
Ciprofibrate	After review switch to a more cost effective fibrate or another alternative treatment	Ciprofibrate is non formulary	
Co-Proxamol	Paracetamol +/- weak opioid	STOP prescribing	
Dicycloverine (any dose and formulation)	Mebeverine, Hyoscine, Alverine, Mintec	Avoid prescribing - poor NHS value	

2024/25 Savings Recommendations
Prescribe Well – Spend Less

Dosulepin	Alternative antidepressant (SAFETY ISSUE)	Low Value Medicine	
Targinact (oxycodone & naloxone)	Opioid & separate laxative	Avoid prescribing combination - Low Value Medicine	
Trimipramine	Alternative antidepressant	Low Value Medicine
