* Direct products will be delivered directly to you from the manufacturer and may arrive on a different day to your usual delivery.

* Blue Diamond Products have a longer lead time and may arrive after your usual delivery.

* Although a TWN can prescribe any wound care product on formulary, the expectation is for other nursing teams to retain prescribing/ordering of most dressings.

Formeo is an online ordering platform for healthcare staff working in GP practices, nursing homes and BaNES community settings to order wound care products. Prescribing wound care products on FP10 prescription can be wasteful because the items dispensed can only be used for that one patient. Products ordered via Formeo may be obtained at a lower price than on FP10 and they become the property of the GP practice/nursing home/clinic, so a box of dressings can be used for multiple patients - reducing wastage.

The BSW Wound Care Management Group works to ensure the woundcare formulary includes a comprehensive list of clinically and cost-effective choices that have been approved for use by BSW specialist TWNs.

The formulary should cover the vast majority of prescribing. In the event that the formulary does not meet the needs of your patient, advice should be sought from the TWNs. The advice should be clearly documented on the patient records. We welcome feedback on the formulary - bswtw prescribing@nhs.net. We will also actively monitor FP10 prescribing for formulary feedback and training need analysis.

Document Review	Date	Details
Second edition	Jun-23	Added PICD and Mollistat to TWN formulary; removed 365 Healthcare Dressings packs as Softdrape Dressings Packs are back in stock; removed Opsite Post Op dressings as these have been delisted and added 365 Island Dressings as the alternative.
